How Electronic Air Cleaners Work:

The HE Plus Electronic House Air Cleaner uses a high-voltage ionizer within the air cleaner that electrically charges airborne pollutants and particles. TRION® electronic air cleaners feature electrostatic precipitators - a series of metal collection plates that are oppositely charged to the ionized particles. The negative filter plate then attracts and captures these microscopic particles, preventing them from being recirculated in the home. TRION® systems offer high performance and efficiency, ultra-quiet operation and no filters to replace.

Features & Benefits:

- The strongest, most reliable power supply and the sturdiest cell in the industry – recognized by dealers nationwide.
- Forever Filter® never needs replacing – just clean and reuse.
- Connects directly to all types of heating and cooling systems.
- Permanent, washable aluminum collection cells deliver longer service life and are easy to clean.
- Greater overall HVAC system efficiency because units keep cooling coils clean.
- Electronic Airflow Sensor: Automatically senses air movement within the duct, resulting in reduced power usage.
- Built-In Internal Fuse: Protects the 24v transformer in the event of a power supply failure.
- All units are UL/C-UL Listed and are easily converted to 240v.
- Rugged cabinet construction for long life.
- Optional Charcoal After-Filter reduces common household odors.

Warranty:

- 5-Year Limited Warranty.
