

TRION Introduces a High Output, Low Cost UV-C Lamp for the Residential Market

Powerful UV defense against bio build-up in A/C coils improves indoor air quality

SANFORD, NC (May 18, 2015) — The most cost-effective UV defense system in today's domestic HVAC market is now available from [TRION](#), an innovative, international company dedicated to providing quality products for the residential, commercial, and industrial markets since 1947. The TRION [ComfortBreeze™ UV360-1](#) enables noticeably cleaner air by attacking mold, reducing allergens, and eliminating air conditioning (A/C) odor. Its powerful UV defense combats dangerous bio build-up occurring inside the air handler and coils. With removal of bio-film on the coils, the A/C unit will run more efficiently, thus reducing A/C cost.

For A-coil applications, UV-C technology is the most viable agent to strengthen the indoor air quality (IAQ) solution. Though UV-C technology has been available for years, the high price has driven customers away from purchasing. The high quality but low cost of TRION's ComfortBreeze™ UV360-1 offers the opportunity for homeowners to improve their indoor air quality at a reasonable price.

The ComfortBreeze™ UV360-1:

- Reduces A/C run time - and thus energy use - while improving comfort and health
- Delivers disinfected air for pennies a day
- Has a safe 24V low-voltage system
- Is convenient, reliable, and affordable
- Is fast and easy to install and service
- Includes: replaceable, high-output 17" UV-C lamp; affixable mounting hole template and hole saw; and 120V to 24V plug adapter

"We are pleased to continue providing our business partners and customers with additional products that complement our line and their needs. The ComfortBreeze™ UV360-1 is another great indoor air quality solution that emphasizes clean air and energy savings," says Tony Quick, Director of Residential Sales at TRION.

More information about the ComfortBreeze™ UV360-1 and other residential air quality applications is available at [TRION Residential Products](#) or by contacting TRION at customerservice@trioniaq.com.

About TRION

TRION Indoor Air Quality (IAQ) provides innovative products across the commercial, industrial, and residential markets. Specifically, TRION manufactures air cleaners, air filters, humidifiers, dehumidifiers, kitchen exhaust units, mist precipitators, and smoke eliminators. TRION's IAQ solutions are engineered specifically to provide a clean, safe, and comfortable indoor air environment. TRION IAQ is a brand within Air System Components, Inc. (ASC). ASC is a division of Air Distribution Technologies, Inc. (ADTI). ADTI is a subsidiary of Johnson Controls. For more information about TRION IAQ solutions, contact your local representative or visit us on the web at <http://www.trioniaq.com>.
